

Proceed as follows:

- Access PBX via SSH
- Copy template from `/usr/local/share/scripts/` to working directory `/usr/local/bin` and rename file:`cp /usr/local/share/scripts/smsdrxcb.sh.sample /usr/local/bin/smsdrxcb.sh`
- Set result file as executable:`chmod a+x /usr/local/bin/smsdrxcb.sh`
- Fill script by user actions
